Arione Dauis

Full Stack Web Developer

Cainta, Rizal, Philippines | +63 961 995 1286 | dauis.arionejohn@gmail.com | linkedin.com/in/arione-dauis

SUMMARY

Full stack web developer with experience shipping production applications using Next.js, React, Node.js, and TypeScript. Led a 10-person team to deliver an event ticketing platform and contributed to testing and release automation on a live US SaaS product. Computer Science graduate (Cum Laude) comfortable across frontend, REST APIs, databases, automated testing, and Linux/Docker deployments.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, PHP, SQL, Python
Frontend: Next.js, React, HTML, CSS, Tailwind CSS, ShadCN, Radix UI, Figma
Backend & APIs: Node.js, REST APIs, WebSockets, JWT / OAuth 2.0, Stripe API, Google API, OpenAI API
Databases: MongoDB, MariaDB, SQLite, Redis
Testing & Monitoring: Jest, Playwright, Postman, Unit Testing, End-to-End Testing, UAT, Sentry
DevOps & Infrastructure: Docker, Linux (Debian, Ubuntu Server), GitHub Actions, CI/CD, AWS, DigitalOcean, Nginx
Tooling & Workflow: Git, GitHub, JIRA, VS Code, Cursor, Claude Code, Agile / Scrum

PROFESSIONAL EXPERIENCE

Freelance Web Developer & IT Consultant — Self-Employed | *2021 – Present*

- Delivered web projects independently from brief to launch, serving as a single point of accountability across design, development, QA, and cross-browser testing.
- Repeat-hire technician for local and international clients, resolving software and performance issues remotely and on-site with minimal downtime.

Software Engineer — American Sourcing Group (ASG Platform), Remote | *September 2025 – March 2026*

- Expanded automated test coverage for a live US SaaS system, reducing bug risk in production and tightening the feedback loop before each release.
- Built a staging pipeline automation system that eliminated repetitive manual steps and improved team delivery speed by 35%.
- Worked within a professional engineering workflow of branching, versioning, and sprint commitments, helping the team deploy on schedule every cycle.

Full Stack Head Web Developer — ALPHA, Cainta, Rizal | *January 2024 – December 2024*

- Led a 10-person engineering team in delivering a full event ticketing platform, owning both technical direction and team execution end-to-end.
- Architected a scalable data layer that maintained accuracy and reliability under production load as the platform grew.
- Wrote onboarding documentation and mentored developers within sprint cycles, reducing knowledge silos and keeping deployments free of bottlenecks.

PROJECTS

Palette Mail — Web-Based HTML Email Editor | *Next.js, Radix UI, MongoDB, Nodemailer*

- Built a full-stack email crafting and delivery platform for developers, with a web-based code editor and a Visual Builder for composing styled HTML emails.
- Implemented scheduled sending, MongoDB-backed persistence, and Two-Factor Authentication (2FA) through authenticator apps.

Carisle Media HRS — Applicant Tracking System (Project Lead)

- Led a team in building a web-based ATS with automated email workflows, rule-based candidate scoring, and a centralized applicant dashboard.
- Owned sprint planning, backend API development, and technical documentation across the full delivery cycle.

Self-Hosted Multiplayer Game Server Infrastructure | *Docker, Debian, DigitalOcean*

- Deployed and managed multiple containerized game servers with Docker on a Debian DigitalOcean droplet, secured with firewall rules to restrict unauthorized access.
- Optimized performance and extended functionality through mod integration, memory and storage management, and regular backups to keep live servers stable.

EDUCATION

BS in Computer Science — Cum Laude, STI Colleges Ortigas-Cainta
